He also emphasized the need to relocate the traders at Kakrao Centre who are risking their lives in carrying out businesses along the busy Kisii – Isebania Road.

He brought to the attention of the residents of Kakrao that the operations of Kakrao market included development of permanent market shade with display racks, ablution block, permanent kiosks measuring 10 feet by 10 feet around the market space and fencing of the market area.

Municipal Manager taking the municipal residents on the market proposals

He stated that no kiosks were vandalized to create space for improvement of the market. And none was relocated during commencement of development. The building works also involved building of market stands and shades, ablution block and fencing of the market.

The manager brought to the attention of the public that upon completion of development of the market kiosks, the following criteria will be considered.

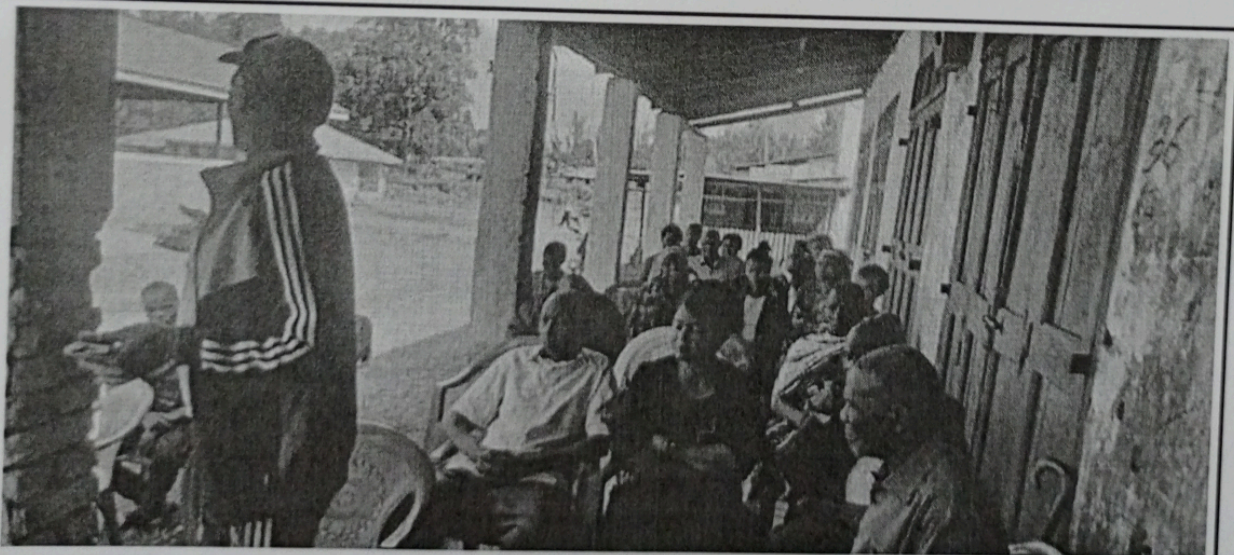

- The first priority will be given to the original occupants of the market area whose structures were demolished to pave way for space for developing the Kakrao Market.
- The relocated traders from Kakrao centre will follow second in order of allocation.

- Vendors will be categorized and grouped depending on the type of goods they vend.
- Issuance of stalls and kiosks will be dependent on the type of commodities sold.
- The excess stalls and kiosks after allocation to the prioritized vendors will be allocated to the general public. The public would be subjected to a balloting process of picking **YES** or **NO** ballots. The number of YES ballots would equal the surplus kiosks and stalls. The YES option picks would be the lucky ones.
